Code Repository
Synchronizo

Abhijeet Chakrabarti, Ammar Askar, Brian Quinn, Eric Lee

January 27, 2017

Our source code is managed with the version control system *git*. The central repository for the source code will be hosted on *Github* under the project leader's account. The URL for the central repo is: `https://github.com/ammaraskar/synchronizo`

Once our Project Coordinator provides us with their Github username, we can provide them access to the repo.
